## Management and Leadership

### Environmental Policy Statement

*"MOM's Purpose is to protect and restore the environment."*

See <https://momsorganicmarket.com/ourpurpose/>  
<https://www.youtube.com/watch?v=V06sMnmUJ6U>

*MOM's communicates the importance of renewable energy through social media, press releases, in-store signage, participation in local legislative and lobbying events, window decals, website, and participation in community environmental events and cleanups. MOM's believes their most valuable asset is their employees. They host educational field trips, solar site tours, environmental presentations, and more. With this first-hand knowledge, employees are empowered to speak enthusiastically about MOM's and their commitment to the environment.*

### Environmental Team

*MOM's created an internal initiative called Environmental Restoration (E.R.) Captains in an effort to preserve, protect, and restore natural resources. Each store has an employee in this role. They promote MOM's green power and serve as the environmental subject matter expert. ER Captains are responsible for fulfilling MOM's Purpose and seeing it upheld at every store; educating staff on upcoming initiatives; ensuring sustainability efforts are met; connecting with local environmental groups; attending educational field trips and meetings; planning volunteer events, and more!*

**Environmentally Preferable Products and Services**

*Ingredient Standards:*

- *MOM's chooses organic and stocks a higher volume of organic products than any other store, including all certified organic produce.*
- *When considering new items to sell at MOM's, ingredients are closely reviewed. If the product is not certified organic and contains a high-risk GMO ingredient, MOM's asks the company to confirm it is not a GMO. If they cannot provide confirmation, MOM's will not carry the product.*

*Stuff MOM's Doesn't Sell in their Food:*

- *Artificial colors, preservatives, or sweeteners*
- *High fructose corn syrup or preservatives*
- *Hydrogenated oil*
- *Meat or dairy with antibiotics or growth hormones*
- *Bleached or bromated flour*
- *Bulk dried fruit with added sulfites*
- *Meat with nitrates or nitrites*
- *Cottonseed oil*
- *Imported or domestic, non-sparkling waters*

**Environmental Restoration or Community Environmental Projects**

*Each MOM's location volunteers in their community once each quarter cleaning up trash, removing invasive plants, restoring trails, and planting native plants.*

*MOM's believes it can have the greatest impact by partnering with organizations that share their environmental commitment while bringing their own focus and expertise on issues they care about. By working with these partners, MOM's has a greater opportunity to take action, reach out, offer fresh perspectives, expand awareness, educate, share solutions, change behavior, and ultimately make a difference.*

*In addition to these partnerships, MOM's donates to local community and environmental partners that support their Purpose, To Protect and Restore the Environment. MOM's is proud to provide event support and donations to certified 501(c)(3) nonprofit organizations within our local store communities. See here for more information on our partnerships:*

## Waste

### **Solid Waste Reduction and Reuse**

*In 2005, MOM's eliminated plastic bags from all stores and introduced a \$.10 bag credit for customers who use reusable bags.*

*In June 2010, MOM's launched Plastic Surgery, a comprehensive storewide effort to eliminate unnecessary plastic waste in every way possible. The first (and most important) step was to ban bottled water.*

### **Recycling**

*MOM's offers extensive recycling to customers, providing a free place for hard-to-recycle items. All 23 stores have recycling centers where they allow drop off for a myriad of recyclable items, including alkaline batteries, shoes, corks, eyeglasses, cell phones, and tablets. A full list of accepted items may be found on MOM's website. Additionally, MOM's offers annual denim recycling – providing customers a place other than the landfill for used, worn-out denim, and an annual Holiday Lights drive to collect 'dead' lights to reclaim and recycle metal materials.*

*See website for specific items and last year's recycling totals:  
<https://momsorganicmarket.com/recycle-center/>*

### **Composting**

*MOM's collects all food waste for composting, including eggshells, coffee grinds, containers labeled "compostable" or "biodegradable." All serving ware (food containers, cups, napkins, and utensils). from Naked Lunch, MOM's all organic, vegetarian eatery, is also compostable.*

## Energy

### **Energy Efficiency**

- *MOM's uses ultra-low watt LED overhead, track, refrigerated, case, and exit lights. LED parking lot lights are used in some stores.*
- *Offices and restrooms utilize motion sensor lights with dimming to help reduce consumption.*
- *MOM's installs adjustable AC units.*
- *MOM's maintains a no open door policy, prohibiting cooler doors from being propped open. They power down all unnecessary lights and equipment when not in use, and install skylights where permitted.*

## Renewable Energy

*100% of the electricity used to power MOM's is offset by Certified Renewable Wind and Solar Energy. They've been committed to 100% renewable energy power since 2005. MOM's uses a variety of renewables to support this goal, including purchasing 100% American Wind RECs and utilizing a combination of both onsite and offsite solar power PV systems.*

### *Solar Power at MOM's:*

- *In Feb. 2013, MOM's installed solar panels at their Waldorf location.*
- *They expanded their renewable energy portfolio in July 2016, when a MOM's designated 1.5-megawatt solar farm in Kingsville, MD went live.*
- *MOM's Solar Farm outputs 2,124,000 kilowatts/year and they're purchasing the entire system's output for the next 20 years.*
- *The power generated by this solar farm accounts for 25% of the total power needs of MOM's stores.*
- *In April 2017, White Marsh's solar panels went live – generating ~30% of the store's energy usage.*

### *Wind Power at MOM's:*

*MOM's supports renewable energy projects by purchasing Wind Power Renewable Energy Credits (RECs) to offset over 100% of the company's electrical usage. In 2022, MOM's purchased 14,500 Wind Power RECs. The benefit of MOM's purchasing wind power is equivalent to offsetting the greenhouse gas emissions from:*

- *2,177 passenger vehicles driven for one year*
- *23,739 barrels of oil not being used*
- *7,423 acres of US forests for one year*

## **Transportation**

### Employee Commute/Customer Travel

#### *Employee Benefits:*

- *Employees receive a 15% contribution toward the purchase of an electric or hybrid vehicle. <https://momsorganicmarket.com/recycle-center/>*

#### *Consumer Benefits:*

- *EV Charging: MOM's is a proud member of the U.S. Department of Energy's [Workplace Charging Challenge](#) and believes that electric and hybrid vehicles are a great opportunity to reduce global warming emissions. MOM's hosts free Level II car charging at most locations and provides access to workplace charging at their Central Office.*
- *We Love Inflation Initiative: MOM's provides free tire pressure testing for customers' cars to help improve fuel efficiency. See here: <https://www.youtube.com/watch?v=BwOkzwwOemg>*

### **Fleet Vehicles**

*Our company car is the Nissan Leaf and we are part of the U.S. Department of Energy's Workplace Charging Employer Partners Program:*

*<https://energy.gov/eere/vehicles/workplace-charging-employer-partners>*

## **Environmental Certification Programs, Awards, and Other Activities**

*Mom's Organic Market is a member of the [Climate Collaborative](#), a growing number of natural product companies taking meaningful steps to reverse climate change.*
