

## Maryland Green Registry MEMBER

The Maryland Green Registry promotes and recognizes sustainable practices at organizations of all types and sizes. Members agree to share at least five environmental practices and one measurable result while striving to continually improve their environmental performance.

### Management and Leadership

**Environmentally Preferable Products and Services**

*We help to inform our clients of the BGE Smart Energy Savers programs that are available to them.*

**Environmentally Preferable Purchasing**

*We have purchased furniture made from recycled materials, including our desks, a couch made from recycled plastic soda bottles, and a conference room table and chairs made from wood recycled from a boat found at the bottom of a river.*

### Waste

**Solid Waste Reduction and Reuse**

*We use electronic signatures on contracts to reduce paper use and the continuous faxing and printing of contracts.*

*We mostly use email rather than direct mail for all of marketing ads, announcements and flyers.*

*We have reduced the use of disposable water bottles/coffee cups/food packaging by providing cups and mugs, and encouraging employees to pack their own lunch each day*

**Recycling**

*We recycle plastic, paper, aluminum, and glass.*

**Composting**

*We have a composting bin at our office for food and yard waste. We also encourage neighborhood children to get involved by dropping off bags of kitchen scraps.*

**Energy**

**Energy Efficiency**

*We have replaced lighting with energy efficient bulbs.*

**Transportation**

**Efficient Business Travel**

*Our owner replaced a vehicle that got 14 mpg with a hybrid vehicle that gets 44 mpg, reducing fuel usage by 619 gallons annually.*

***Profile Updated October 2018***

*Help build a greener, more sustainable Maryland through voluntary practices that reduce environmental impacts and save money.*
